Grid-in Instructions

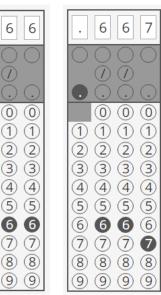

These are the acceptable grids for $\frac{2}{3}$

6

0

6

2 / 3	. 6
0000	$\bigcirc \bigcirc$
$\bigcirc \bigcirc $	\mathbf{O}
	0
2 2 2 2	22
33333	33
(4) (4) (4) (5) (5) (5) (5)	(4) (4) (5) (5)
66666	66
$ \overbrace{\mathcal{I}}^{\bigcirc} \overbrace{\mathcal{I}}^{\bigcirc} \overbrace{\mathcal{I}}^{\bigcirc} \overbrace{\mathcal{I}}^{\bigcirc} \overbrace{\mathcal{I}}^{\bigcirc} \overbrace{\mathcal{I}}^{\bigcirc} $	$\overline{\mathcal{O}}$
8888	88
9999	99

For grid-in questions, solve the given problem and enter your answer into the grid as outlined here.

- 1. Although it is not required, we suggest that you write your answer in the boxes at the top of the columns to help you fill in the circles. Your answer will count only if the circles are filled in correctly; anything that you enter into the boxes will not be scored.
- 2. None of these four questions have a negative answer.
- 3. Some problems may have multiple correct answers. In these cases, enter only one answer.
- 4. Mixed numbers such as 1 ³/₄ must be entered as 1.75 or 7/4. (If 13/4 is entered into the grid, it will be interpreted as 13/4, not $1\frac{3}{4}$)
- 5. Decimal answers: For decimal answers with more digits than the grid can accommodate, you may either round or truncate your answer, but it must fill the entire grid.
- 6. For answers that require fewer than four columns, you may start your answers in any column. Any column that you do not use should be left blank.
- 7. Click the blank bubble in the top row to clear your selection for that column.

Answer is 441; either of these is correct.
